FLYING DREAMS

FÖRDERVEREIN ZEPPELIN-TOURISMUS E.V.

THE FÖRDERVEREIN AND ITS OBJECTIVES

The Förderverein Zeppelin-Tourismus e.V. is dedicated to the objective of actively supporting Zeppelin tourism. In the Articles of Association it states, "The society will engage in all activities which are suitable to stimulate attractive, ecologically responsible and historically culturally significant tourism".

In this connection members will be informed regularly as to the development of the Zeppelin Europe Tours project and the new 45 seater. Additionally, other developments in the field of airship flight will be reported.

THE TIME IS RIPE FOR NEW THINKING

Values change — in today's age, tranquility, space and time gain a whole new attractiveness. To travel with the Zeppelin, floating peacefully and seeing the varying countryside is to experience and enjoy nature from a completely new perspective. A new and, at the same time, old experience in the tracks of the aviation pioneers is to discover Europe anew and in the truest sense of the word once again to make the journey the objective. As in the era of the great Zeppelins, comfort, individual care and an exclusive ambience in the airship and on the ground will assume the greatest value. A trip in the airship was and will once again become a special and incomparable experience for the passenger.

The Zeppelin Europe Tours, established in 2005, will make the dream of European Zeppelin tourism a reality. The Förderverein Zeppelin-Tourismus e.V. supports this project whereby Zeppelins will establish links between European cities. With this, not only will the technical concept of Z-airships but, above all, the detailed business plan, set new standards. The project team brings together 20 people with all relevant areas of expertise. Many of them bring to the project important experience relating to the

A flight with Zeppelin Europe Tours —
travel in a new dimension.

development, construction and flight operations of the existing Zeppelin concept.

The basic concept is an integrated tourist system with 10 airship stations located in a number of European countries. The airships will fly a circular route to all stations regularly in turn. Additionally, one and two-hour flights will be offered over the cities and immediate regions. In addition to touristic aspects, there exists considerable interest from business which will use the airship as a means of advertising and image-projection as well as a basis for promotional activities. Help us with this and support this promising project — become a member of the Förderverein Zeppelin-Tourismus e.V.!
